

GUIDELINES FOR TRANSPORTATION OF THE EXTRACTED COAL

ISSUED ON 1st SEPTEMBER, 2014 BY THE COMMITTEE
CONSTITUTED BY THE HON'BLE NATIONAL GREEN TRIBUNAL
VIDE ORDER DATED 1ST AUGUST, 2014 IN O.A. NO. 73 OF 2014

- I. These guidelines are issued in compliance with the order of the Hon'ble National Green Tribunal (NGT) dated 1st August, 2014 passed in O.A. No. 73 of 2014. In framing these guidelines, the Committee has taken note of the following:
 - A. Royalty is collected by the State Government under Section 21 (5) of the Mines and Minerals (Development and Regulation) Act, 1957, as amended, in the form of a penalty on the mineral extracted from any land. The levy of royalty on coal by the State Government has been upheld by the order dated 22/11/1988 of the Hon'ble Guwahati High Court in (Civil) Rule No.6 (SH) of 1983. Thus, legally, royalty is payable on the extracted coal irrespective of whether or not it is sold, transported or consumed otherwise.
 - B. The Hon'ble Supreme Court judgement dated 9th November, 2005 in Writ Petition (Civil) 136 of 2003 regarding over loading of vehicles wherein the Supreme Court ordered that compounding of the offence of over loading does not amount to authorising continuation of the offence and the vehicle cannot be permitted to carry the excess load.
 - C. The Transport Department of the Government of Meghalaya has submitted a report dated 14th August, 2014 on the steps taken by the Department in compliance with Para X of the order dated 9th June,

2014 of the Hon'ble Tribunal relating to setting up of weigh bridges at all the exit points of the State. The report indicates that as on date, weigh bridges of the Transport Department are operational at only 3 (three) locations, namely - at 7th Mile (Pasyih) on NH-44 in West Jaintia Hills District; at Sarangma on NH-62 in North Garo Hills District and at Umling on NH-40 in Ri Bhoi District, of which only 1 (one) weigh bridge (Umling) is at the exit point of the State. There are no weigh bridges at the other 10 exit points.

- D. All the exit points of the State have duly authorised departmental check gates. Another check point between the loading point and the exit point as desired by the Hon'ble Tribunal is not found feasible due to lack of infrastructure. Temporary check points, if established, will lead to serious traffic problems. This has been apprised to the Hon'ble Tribunal.
- E. Given that the coal stocks are wet, weight obtained through weigh-bridges would not be accurate, as this will give the weight of wet coal. The assessment of the extracted coal quantity in metric tonnes (MT) has been done by adopting a volumetric method - volume of stock in cubic metres x 0.88 being the standard conversion rate for Meghalaya coal (dry) as notified in Rule 10(2) of the Meghalaya Mineral Cess Rules, 1989. Hence, for the sake of uniformity as well, monitoring of coal exiting the State needs to be done by the volumetric method. This has also been apprised to the Hon'ble Tribunal.

F. The rainfall data for Shillong, Nongstoin and Baghmara has been obtained from the Regional Meteorological Centre, Guwahati for the months from April to August 2014. This was felt necessary as inspection and assessment of the extracted coal in the 2(two) Districts, namely, West Khasi Hills and South Garo Hills could not be completed during the high rainfall month of August 2014 due to adverse weather conditions making the mine locations inaccessible. This has also been apprised to the Hon'ble Tribunal.

G. The process of assessment of the coal quantity has revealed certain disturbing trends in respect of declarations made by the coal owners. A large number of coal owners have made false declarations without having any coal stock. Some mine owners have grossly over declared their stock. These can only be attributed to malafide intent to mine coal despite the interim ban or illegal disposal of the coal after the declaration but before the assessment. Such cases need to be penalised. There are a few cases of gross under declaration as well, but this is addressed now since the actual quantities have been assessed. The consolidated District wise statement of declared and assessed quantity is at Annexure-I. Mine owner wise details for the 6 (six) Districts, where assessment has been completed, are at Annexures- II to VII.

II. Having considered the above, the Committee frames the following Guidelines for removal and transportation of the extracted coal from the 6 (six) Districts that have completed the assessment, namely, East Jaintia Hills, West Jaintia Hills, East Khasi Hills, South West Khasi

Hills, East Garo Hills and West Garo Hills, for compliance by all concerned parties:

- 1) Upon issue of Notification by the State Government allowing transportation of coal, all coal mine owners shall be given 14 (fourteen) working days time for payment of royalty. Royalty will be payable on the quantity assessed/ declared, whichever is higher. The Transport Permit against this, however, will be restricted to the assessed quantity only. The collections will be done District wise. Mine owners who do not comply with this directive are liable for prosecution under Section 21(1) of the Mines and Minerals (Development and Regulation) Act, 1957/ Section 177 of the Indian Penal Code, 1860.
- 2) On the following day after collection of royalty, as above, the Director of Mineral Resources (DMR) shall notify the date from which the office of the DMR will start issuing the Transport Permits. The period of 3 months allowed for transportation as per the NGT order dated 9th June 2014 shall commence from the said date i.e. the date from which Transport Permits are issued by the DMR. Owners will then be issued Numbered Transport Permits (TP) by the offices of DMR. This will also be done District wise. Owners who pay their full royalty dues will be eligible for Transport Permits. Permits will be issued against Assessed Quantity only. The Permits will be issued on a first-cum-first-serve basis. Each Transport Permit will have a validity period of 30

(thirty) days from the date of issue. Before issue of Permits during the third month, due care will be exercised by the DMR to cross check with the data on coal already moved out of the State vis-à-vis the total permits issued till the second month so that permits are issued only against available assessed stock. The validity period of the Permits issued during the third month will be restricted to the last date of the three month period permitted for transportation in terms of the Hon'ble Tribunal Order dated 9th June 2014.

- 3) Total Transport Permits issued for a District will thus be limited to the quantity assessed for the District by the Committee, for which royalty has been paid. Each Permit will be for maximum 9 MT of coal that can be carried in each truck. Each Permit will have 3 copies of challan - one copy to be kept at the issue office of DMR, one copy to be retained at the exit point/gate and one copy will be handed over to the transporter/ buyer by the owner.
- 4) During verification and assessment, there are cases where the owner of the assessed quantity could not be ascertained. Persons claiming ownership in such cases will have to establish the same before the Deputy Commissioner of the District concerned, who shall then recommend such cases to DMR.
- 5) All coal owners shall maintain registers of declared quantity, assessed quantity, date wise sale, date wise loading and date wise despatch of the coal in the proforma placed at Annexure-VIII.

These registers will be subject to the verification of the District Magistrates and the DMR.

- 6) The weight of coal loaded in each truck will be quantified by volumetric method at the exit point of the State. Verification of the loaded quantity at the exit point is to be entered on the reverse side of the challan by the DMR staff. The challans will be properly stamped at the exit point so that they cannot be reused. A register for recording data pertinent to quantification of stock exiting the State shall be maintained by the DMR check gates with particulars of date, time, truck number, Transport Permit No. and quantity. All entries will be duly signed by the senior most official manning the check gate.
- 7) A maximum of 9 MT will be allowed to be transported by each 2-axle truck, which will be in conformity with the Supreme Court ruling. The normal standard loading dimensions for each truck shall be 15ft (L) x 7ft (B) x 3.5ft (H). In case of variation in the dimensions of the truck, the loading height will be suitably fixed so that the load quantity does not exceed 9 MT. Only 2-axle trucks will be permitted to carry coal. For easy identification by Volumetric Methodology, each truck shall have to fix a permanent fluorescent line on 3 (three) sides of the body of the truck indicating the height of loading. The Transport Department will issue directions to ensure that all transporters comply with the requirement of a Permanent Fluorescent Line' on 3 (three) sides of the body of the truck so that the loading is restricted to 9 MT.

- 8) The transporter will have to ensure that the truck is loaded to permissible load of 9 MT or less. In case of any truck carrying excess coal beyond the permissible load of 9 MT, penal action under Section 194 of the Motor Vehicle Act shall be initiated by the Transport Department and the excess quantity shall be off-loaded. The District Magistrates shall identify one or more suitable locations in the District where such off-loading can be done. The stacking of off-loaded coal, if any, must be done with due consideration to environmental aspects. The District Magistrates will take steps for quick disposal of the off-loaded quantities by auction.
- 9) Trucks transporting the coal should have valid Vehicle Permit from the Transport Department. Special marking with - **COAL TRANSPORTED UNDER NGT ORDER** - will have to be pasted on the windshield from inside of the truck transporting the coal. Fluorescent stickers with these markings will be issued by the DMR offices along with the transport permits.
- 10) To the extent of availability, mechanically designed covered trucks should be used for transportation. Otherwise, the loaded truck should be fully covered with tarpaulin during the period of transportation so that there is no spillage. Adequate freeboard should be kept to avoid spillage. In case of spillage enroute, the transporter will ensure that spilled coal is collected and transported to the consumer site. There should be no washing of

the coal truck en route. Only washing of wheels of the trucks should be done at the loading and the unloading points. Movement through thickly populated areas should be avoided, as far as practicable.

- 11) The Taxation/Transport gates will maintain separate records of all the coal trucks exiting the State. Coal dealers transporting coal outside the State shall obtain "Permit Form" in Form 37 from the Office of Superintendent of Taxes concerned, which is to be produced at the Taxation exit check gate.
- 12) The State Consumers are mainly the cement plants (15 Nos.) in the State. All the cement plants will have to maintain records of the name of the challan holder/ supplier and address, VAT Registration Number (TIN), truck registration number, quantum of coal and cost price of coal received. The same will have to be submitted to the Office of the DMR and the Commissioner of Taxes on a weekly basis.
- 13) A temporary integrated check gate will be set up at Umtyra by the DM, East Jaintia Hills to be manned by the Mining and Taxation Departments. The District Magistrate will notify the permissible hours for movement of coal trucks through this check gate. The coal trucks shall have to furnish the following documents at the Gate: (1) Transport Permit issued by DMR (2) copy of VAT Registration Certificate and (3) Evidence of payment of VAT.

- 14) The movement of the loaded trucks along the transportation routes will be monitored through composite mobile patrols comprising Magistrate, Police and Transport officers to be detailed by the District Magistrates, who will ensure that no over loading and no washing of the loaded trucks along the transport route is being under taken. The State Govt. may consider notifying additional Executive Magistrates on the request of the District Magistrates.

- 15) The transportation of coal will be in accordance with the transport route as indicated in the Map (Annexure - IX). Traffic will be regulated by the State Police. Speed limit of 40 kmph should be enforced for these trucks. All Exit points are check points.

- 16) All coal laden trucks will have to pass through one of the following 9 (NINE) designated exit points of the State manned by DMR staff:
 - i. **Dainadubi** -North Garo Hills District exiting to Assam
 - ii. **Umling-Ri**- Bhoi District exiting to Assam
 - iii. **Garampani**-West Jaintia Hills District exiting to Assam
 - iv. **Umkiang**-East Jaintia Hills District exiting to Assam
 - v. **Dawki**-East Khasi hills District exiting to Bangladesh
 - vi. **Borsora**-South West Khasi Hills exiting to Bangladesh
 - vii. **Cherragoan**-South West Khasi Hills exiting to Bangladesh
 - viii. **Bagli**-South West Khasi Hills exiting to Bangladesh
 - ix. **Dalu** – West Garo Hills exiting to Bangladesh

There are 2 (TWO) more exit points at **Athiabari**, West Khasi Hills District (to Assam) and **Gasuapara**, South Garo Hills District (to Bangladesh). These 2 exit points can also be used after transportation of coal from West Khasi Hills District and South Garo Hills District is permitted.

- 17) All the above exit points will be under the authority and supervision of the concerned District Magistrates within their respective jurisdiction, as long as the NGT order is in force. Wherever feasible, the District Magistrates may use one of the existing check gates at the exit point as an integrated check-gate of the Mining, Taxation and Transport departments.
- 18) Welfare of the labourers as per the Labour Laws will have to be ensured by the coal owners/ transporters/ employers, in particular the following:
 - a) No child under the age of 18 (eighteen) years shall be employed by any employer including any contractor engaged by the employer in terms of Section 45 of the Mines Act, 1952.
 - b) Compliance with the health and safety norms as laid down in Chapter V and VI of the Mines Act, 1952, in particular - providing helmets, masks, hand gloves, safety shoes and raincoats to the labour by the employer, shall be ensured.
 - c) Appropriate compensation shall be paid in the event of accidental injuries and death as under the Employees Compensation Act, 1923.

- d) Wages paid to the labourers shall not be less than the Prescribed Minimum Wages in the State.
 - e) Gratuity as applicable under The Payment of Gratuity Act 1972 shall be paid to all eligible employees.
 - f) Owners/ Transporters/ Employers engaging Inter-State migrant workmen shall register with the jurisdictional Deputy Commissioner or the Commissioner of Labour, who are the registering officers under the Inter-State Migrant Workmen Act, 1979. They shall ensure compliance with the said Act and the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Services) Rules, 1985 framed there under.
- 19) Daily monitoring of coal movement shall be done by the District Magistrates. DM and SP shall also jointly inspect the check gates in their jurisdiction at least once a week during this period of 3 (three) months. Weekly monitoring of movement at the State level will be done by the Principal Secretary, Mining & Geology. The overall responsibility for monitoring of coal movement shall vest with the Mining & Geology Department.
- 20) Past experience shows that several illegal / unauthorised check gates operate whenever there is movement of coal trucks. The DGP at the State level and the DMs and SPs at the district level will ensure through regular inspections and monitoring that such illegal check gates, wherever existing, are immediately dismantled

and no such illegal check gates operate to ensure proper movement of the coal trucks.

- 21) The Director of Mineral Resources/ Commissioner of Taxes/ Commissioner of Transport shall be the competent authority to represent to the Committee in case there is any difficulty in the implementation of any of the provisions of these Guidelines.

III. These guidelines shall also apply *mutatis mutandis* to the Districts of West Khasi Hills and South Garo Hills, when transportation of coal from these two Districts is permitted. The Committee shall review the position in respect of these two Districts on 4th September 2014.

IV. In terms of second paragraph of page 12 of the Order dated 1st August, 2014 of the Hon'ble National Green Tribunal, the State Government may now, in its discretion issue Notification permitting the transportation of coal from the 6 (six) Districts of East Jaintia Hills, West Jaintia Hills, East Khasi Hills, South West Khasi Hills, East Garo Hills and West Garo Hills subject to strict adherence to the Guidelines, as stated above. In doing so, it is recommended that 7 (seven) working days may be kept for preparatory work of printing requisite forms and issue of orders detailing modalities for collection of royalty and issue of Transport Permits in accordance with these guidelines. It is also recommended that all the concerned departments i.e. Mining & Geology, Taxation,

Member Convenor

Chairman

Transport, Police and the District administration will arrange for a thorough briefing of all the officials involved in the implementation of these guidelines.
