

HEALTH AND FAMILY WELFARE DEPARTMENT GOVERNMENT OF MEGHALAYA

No. HFW/ COVID/2020/01

Guidance on setting up and administration of Corona Care Centres (CCC)- Meghalaya

Dated: Shillong the 29th March, 2020

1. Why Corona Care Centres (CCC)?

- i. Meghalaya has about 300 isolation beds across all its health facilities, both public and private. These numbers will not be adequate in case the infection spreads rapidly and there is a surge in cases (here after called the Surge Scenario) and there is every danger that the health system will be overwhelmed.
- ii. Further, experiences from many countries indicate that effective quarantine and isolation of suspected and positive cases is the most effective strategy to prevent the spread of the Corona Virus.
- iii. It is, therefore, necessary that temporary facilities providing for isolation and medical care be created so that sick individuals with mild symptoms and suspected cases can be effectively dealt with without stressing the health system.

2. What is a CCC?

A CCC is a temporary medical facility created to augment the healthcare system of the State in anticipation of a wide-spread pandemic. The facility can either be in a public or private premise and will have the infrastructure for providing health care for sick individuals with mild symptoms and suspected Corona cases.

3. Who will visit and stay at the Centre?

In a Surge Scenario,

- i. With low testing capacity- Sick individuals with mild symptoms will be asked to report to the CCCs. They will be examined by the doctor and a decision will be made on whether they should be admitted into the Centre or be sent home for home isolation.
- ii. With high testing capacity- Sick individuals with mild symptoms and those who have come in contact with confirmed positive cases will be asked to report to the CCCs. They will be examined by the doctor; test swab will be collected and a decision will be made on whether they should be admitted into the Centre or be sent home for home isolation.

4. Core infrastructure at the CCC

- i. Single- occupancy isolation rooms with attached toilets or with shared toilets.
- ii. Multiple-occupancy isolation rooms with enough spacing between beds to ensure effective isolation.
- iii. A reception area for registration of people.
- iv. A separate area for testing / collecting samples of suspected cases.

- v. A Doctor room for consultation with the doctor and a nursing station.
- vi. A room for the Centre Manager and the data manager.
- vii. Separate stay facility for the Doctors and Nurses.
- viii. One or two vehicles for transportation of all the staff involved in the functioning of the facility.
- ix. Computer (desktop or laptop), printer and wifi.

5. Man power requirements (typical Centre with 50 isolation beds)

		` • • • • • • • • • • • • • • • • • • •	Centre with 50 isolation beds)
#	Man power	Number	Remarks
1	Doctor	1	A dedicated doctor will be needed for bigger centres (50 or
			more beds). For smaller centres doctors can be available on
			call or one doctor can attend to 2 smaller Centres.
2	Nursing /	3	At least one nurse for 20 beds. The number of nurses will
	Paramedicals		depend on the number of beds.
3	Centre	1	The Centre Manager will be the overall administrative head
	Manager		of the Centre and will coordinate with everyone else to
			ensure the setting up and running of the Centre. The
			Centre Manager is responsible for recruitment of the
			volunteers needed for the running of the centre. The State
			COVID response task force will provide the support for
			identification and training of volunteers.
4	Assistant	1	The Assistant Manager will support the Centre Manger in
	Manger		ensuring effective functioning.
5	Data Manager	1	The Data manager will be responsible for managing on all
			the patients
6	Counsellor	1	May be available on call for providing emotional support to
			the patients. This can also be done by trained volunteers.
7	Support Staff	5	The actual numbers will depend on the size of the Centre.
	(including		But every Centre will at least need 5 people for ensuring
	cleaning)		cleaning and waste disposal. The support staff will be
			responsible for ensuring utilities (power and water),
			inventory management and for waste management and
			disposal.
8	Entry/ Exit	4	Two people at the Main Entry and two people at the
	Management		reception and assessment areas.
9	Food and	2	Food at the Centres should be outsourcing to a caterer.
	catering		However, two dedicated people are needed to handle the
			food and to coordinate with the caterer.
10	Reserve	3	Can be deployed to support any of the roles from #4 to
	strength		#9.

Notes:

- a. The Centres will operate 24*7, so all manpower will have to work in two 12-hour shifts.
- b. The Centre Heads/ Managers will be handpicked officials from the Government or experienced private individuals registered as volunteers.
- c. Most of the manpower for the CCCs (except doctors and nursing staff) will be provided by volunteers or by individuals from the Government working with departments other than Health (as Health department staff will have to man the Government hospitals)

	MARCH 2020						

11. All other districts should also start the process of identification of locations for setting of CCCs

Sd/-Commissioner and Secretary Health and Family Welfare Department

Memo No. HFW/ COVID/2020/01-A Dated: Shillong the 28th March, 2020

Copy to:

- 1. All Deputy Commissioners for kind information and necessary action. You are requested to provide all logistical support and volunteers required for the operationalization of the centre. Deputy Commissioners of districts other than EKH and WGH are requested to quickly identify facilities for setting up of CCC and to create a team for setting them up.
- 2. All District Medical and Health Officers for necessary action. You are requested to post the doctors and nursing staff at these centres and ensure the supply of all medical and other items in consultation with the Centre Manager.
- 3. All identified Centre Managers

Sd/-Commissioner and Secretary Health and Family Welfare Department
